WIRED MOUSE

TE-1229S

Optical sensor · 4 buttons · 1.5 m USB cable

ADJUSTABLE RESOLUTION
1000 · 1600 · 2000 DPI

Wired mouse for everyday work. The optical sensor switches between three resolution levels to suit the task, and the 1.5 metre cable reaches the PC even when it sits on the floor under the desk.

REFERENCE IMAGE

RESOLUTION	BUTTONS	CABLE	WEIGHT
2000 DPI	4	1.5 m	75 g

WHAT IT SOLVES

Plug it in, it works, it asks for nothing else

Three DPI levels
1000, 1600 and 2000: the cursor moves slower for fine work or faster on large screens.

1.5 metre cable
Reaches a PC on the floor or at the far end of the desk, with no USB extension in between.

USB, nothing to install
Plugs in and works on Windows 10, 11 and later: no software and no receiver to lose.

75 grams
Compact, 11.1 × 6.5 cm: fits the hand and the pocket of a laptop bag.

TEROS

PART NUMBER
MSCBKTE1229S

DPI: the dots per inch the sensor reads. The higher it is, the further the cursor travels for the same hand movement: 1000 suits fine work, such as selecting cells in a spreadsheet, and 2000 moves quickly across large screens or two monitors.

WHERE IT DELIVERS

Built for the desk that needs a mouse that simply works

OFFICES

Replacing in volume

When many identical desks need equipping or restocking, a wired mouse avoids the constant cost of batteries and of receivers that go missing.

- USB connection
- 1.5 m cable
- 12-month warranty

CLASSROOMS AND LABS

Shared machines

On machines used by many people, the cable keeps the mouse in place and nobody finds it with a flat battery mid-class.

- No batteries or receiver
- Optical sensor
- Boxed

EVERYDAY WORK

Four buttons

Besides the two main buttons and the wheel, it adds an extra button to switch between the three resolution levels.

- 4 buttons
- 1000 to 2000 DPI
- 75 g · 11.1 cm
