GAMING MOUSE

TE-1232G

800 to 7200 DPI · 7 programmable buttons · 100 grams

FROM 800 TO 7200 DPI
Six levels: 800, 1600, 2400, 3200, 4800 and 7200

100-gram gaming mouse with an optical sensor and six resolution levels, from 800 to 7200 DPI. Seven programmable buttons, wheel click included, RGB backlighting and a 1.5 metre USB cable.

REFERENCE IMAGE

RESOLUTION	BUTTONS	POLLING RATE	WEIGHT
7200 DPI	7	125 Hz	100 g

WHAT IT SOLVES

Light, with the low step that aiming needs

From 800 DPI
Six levels between 800 and 7200: the lowest step is the one aiming players use.

7 programmable buttons
Wheel click included: each one can be assigned the action you repeat the most.

Rainbow backlighting
Colour lighting across the mouse body, to match the rest of the gaming desk.

100 grams
12.3 cm long and 100 grams: less inertia when stopping and correcting a movement.

TEROS

PART NUMBER
MSCBKTE1232G

The DPI range: more DPI does not mean better aim: in shooters most people play between 800 and 1600, because a slow cursor gives precision. That is why it matters that the range starts at 800 and not higher: that is the step used for aiming, and the high ones are for large screens or little mousepad space.

WHERE IT DELIVERS

Built for people who play aiming

GAMING

Shortcuts without letting go of the mouse

Seven buttons to keep what you use all the time at hand, and DPI changes on the fly as the match requires.

- 7 programmable buttons
- On-the-fly DPI change
- RGB backlighting

AIMING GAMES

800 DPI and little weight

The 800 DPI step with a 100-gram body is the combination that shooter players look for to stop dead.

- From 800 DPI
- 100 g · 12.3 cm
- 125 Hz polling rate

LARGE SCREENS

Crossing two monitors in one gesture

On dual-screen setups or an ultrawide monitor, the high levels avoid lifting the mouse several times to reach the other end.

- Up to 7200 DPI
- On-the-fly DPI change
- 1.5 m cable

DATASHEET · MOUSE

Sensor, controls, connection and measurements
