360° rotation: the base turns on its own axis, so to show the screen to someone in front or to the side you just rotate it, without lifting the laptop or dragging it across the desk. At a service counter, when reviewing documents or in a desk meeting, that changes how the workstation works.

WHERE IT DELIVERS

Built for the desk where the screen gets shown

CUSTOMER SERVICE

Turn instead of lift

At a counter or a meeting table, the screen turns towards the customer in one movement and goes back just as fast.

HEAVY DEVICES

Eight kilos of capacity
