WHAT IT SOLVES

Style, health and battery life on the same wrist

Interchangeable straps

Three come in the box: the same watch goes from the office to the gym or a night out without buying anything.

Always-on AMOLED

1.85 inches that show the time without raising your wrist, like a real watch.

Four health measurements

Heart rate, blood oxygen, blood pressure and sleep quality, from the wrist.

123 sport modes

From walking and cycling to specific disciplines, with a record of every session.

What "always-on" means: most smartwatches turn the screen off and wake it when you raise your wrist. An always-on display keeps the time visible in a low-power mode, so the watch looks like a watch and not like a black screen. The AMOLED panel makes it possible by lighting only the pixels it needs instead of the whole screen.

WHERE IT DELIVERS

Built for the office, training and going out

EVERY DAY

A watch for every moment
