GAMING CHAIR

TE-8121N

180° recline · 4D armrests · class 4 gas lift

CLASS 4 GAS LIFT
The top grade on the strength scale

Chair with an internal metal frame, high-density foam and PU synthetic leather upholstery. It reclines to 180° with a butterfly mechanism, the armrests adjust in four directions and the gas lift is class 4. Head and lumbar cushions included.

REFERENCE IMAGE

RECLINE	ARMRESTS	GAS LIFT	BASE
180°	4D	Class 4	Metal 35 cm

WHAT IT SOLVES

Made for spending many hours seated

Class 4 gas lift
The highest grade on the usual scale: it is the part that carries the weight as the seat goes up and down.

180° recline
The butterfly mechanism lays the backrest fully flat, to rest without getting up.

4D armrests
They go up, down, in, out and turn: they adapt to the real height of the desk.

Cushions included
One for the head and one for the lower back, which is where a long day is felt most.

TEROS

PART NUMBER
ACCTE8121NV2

The class 4 gas lift: gas lifts are graded by strength, and class 4 is the top grade of the scale in common use. It is the part that bears the weight every time the chair goes up or down, so its class says more about the seat's lifespan than any other figure on the sheet.

WHERE IT DELIVERS

Built for the desk where the hours go by

LONG SESSIONS

Gaming or working without getting up

High-density injection foam, which does not flatten like ordinary foam, plus the two support cushions.

- High-density foam
- Lumbar cushion
- Head cushion

BREAKS AND REST

The backrest becomes a bed

With the butterfly mechanism the backrest goes down until it is flat, so the same chair serves for a nap between shifts.

- 180° recline
- Butterfly mechanism
- 4D armrests

HEAVY USE

Metal where others use plastic

Internal metal frame and a 35 cm metal base with powder coating: the parts that fail first on an entry-level chair.

- Internal metal frame
- 35 cm metal base
- 6 cm nylon castors
